

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

AMERICAN STATISTICAL LIBRARY.

The American Statistical Association possesses a Statistical Library, the result of forty years' collection, which is designed as a depository for statistical works of every nature. At present the Library is placed in rooms 31-33, Rogers Building, Massachusetts Institute of Technology, Boston. Its collection embraces not only the publications of the United States, but also many valuable reports issued by Statistical Bureaus of foreign countries. It also includes the very valuable statistical library collected by the former President, Dr. Jarvis, and bequeathed to the Association upon his death, in 1884. It is believed that the collection and preservation of reports which admit of a classification according to statistical groupings, will be of great public service, and the Association therefore earnestly requests a generous co-operation in still further enlarging the library in such directions.

Reports of vital and social statistics, registration reports, census documents, municipal reports, documents relating to public works, reports of trade, commerce, taxation, finance, insurance, industry, labor, health, crime, education, and religion are especially desired. Due acknowledgment of all donations will be given, and, when practicable, an exchange with the Publications of the Association will be made. It is especially desired that members of the Association will contribute copies of their writings.
